F.A.R.M.S. Provides Book of Mormon Information; Encourages and Supports Research

The Foundation for Ancient Research and Mormon Studies (F.A.R.M.S.) exists primarily to make reliable information from scholarly studies on the Book of Mormon readily available worldwide as economically as possible, as a service to teachers, students, writers, and researchers. F.A.R.M.S. distributes:
- reprints of previously published articles
- papers and working papers on current research
- books
- study aids
- videos, tapes, and slides
- maps
- UPDATES, published eight times a year to brief readers on the latest research
- INSIGHTS, a quarterly newsletter about F.A.R.M.S. projects and publications

The Foundation is co-publisher with Deseret Book Company of a series of scholarly studies on the Book of Mormon, including the Collected Works of Hugh Nibley. F.A.R.M.S. also maintains an archive of unpublished research papers.

The Foundation is an independent, non-profit, tax-exempt organization, incorporated in the state of California in 1979. The Foundation is not part of and does not speak on behalf of any other organization. The opinions expressed in the articles and books it distributes are not necessarily the opinions of anyone except the authors.

Items submitted for distribution under the auspices of F.A.R.M.S. are reviewed by an Evaluation Committee. An Evaluation Editor, currently Dr. John L. Sorensen, and a group of respected researchers constitute an evaluation board. Where necessary, they are aided by the specialized knowledge of a panel of more than 100 others. During the evaluation process, accepted articles are classified for distribution as Reprints, Papers, Working Papers, or Study Aids.

Working Papers carry the explanation that they are tentative papers reflecting substantial research but not yet ready for definitive publication. They are made available to be critiqued and improved, and to stimulate further research. Pages from any paper, working paper, study aid, UPDATE, or newsletter may be reproduced and used, without alteration, addition, or deletion, for any non-pecuniary or non-publishing purpose, without further permission. Some books, reprints, and tapes may require separate permission from copyright owners.

F.A.R.M.S. encourages serious research and cooperation among scholars likely to elucidate the Book of Mormon and works to facilitate such studies. Grants are received and given to support various research and publication projects.

The intent of F.A.R.M.S. is to investigate, by academic and rational means, the text of the Book of Mormon and aspects of its content and setting that reflect history, culture, language, or law, and to enhance our understanding of the Book of Mormon and other scriptures through the methods used in studies of ancient life and modern scholarship.

“Spirit and intellect, study and faith, science and religion, testimony and academics. Often we see these as opposites, but ultimately they are not. If our eye is single to God and his glory, if in our learning we are always willing to hearken unto the counsels of the Lord, if we are equally rigorous about what we think and how we reason, we shall see how all truth may be circumscribed in one great whole and that all things work together for our good.”

—John W. Welch

However, proof of the Book of Mormon remains in the spiritual domain.

The directors of the Foundation are Noel B. Reynolds, Ph.D.; Stephen D. Ricks, Ph.D.; John L. Sorensen, Ph.D.; and John W. Welch, J.D., faculty members at Brigham Young University. Dr. Reynolds, a political scientist, is chairman of the F.A.R.M.S. Research Committee. Dr. Ricks specializes in Near Eastern languages and texts. Dr. Sorensen, emeritus professor of anthropology at BYU, has focused on Mesoamerican archaeology and cultures. John W. Welch, with degrees in law, history, and classics, is professor of law at the J. Reuben Clark Law School and one of the directors of the BYU Religious Studies Center.

The Foundation's funds come from private donations, with the exception of the use of five offices in the Amanda Knight Hall kindly provided by Brigham Young University. F.A.R.M.S. pays an office staff, editors, and professional help; all other officers, directors, advisors, most researchers, and many other volunteers serve without any compensation from F.A.R.M.S. Your donations are essential, tax-deductible, and very much appreciated.

The F.A.R.M.S. Logo

The F.A.R.M.S. logo is composed of characters from four of the main ancient languages and cultures relevant to Book of Mormon research. The Hebrew “aleph” in the upper left and Greek “omega” in the lower right are the first and last letters of their alphabets, standing for the “first and the last” (Isaiah 48:12), who is Jesus Christ. The Mayan glyph is stylized, representing Mesoamerican studies. The Egyptian “Wd3t-eye” was an ancient symbol of resurrection, since a myth told how the eye was torn into pieces and put back together. It also has a connection with the Book of Mormon, since the “pieces” of this eye were used by the Egyptians as binary fractional mathematical symbols used for their grain-measures, reminiscent of the weights and measures of the Nephites in Alma 11. The round pupil of this eye was also used as the round outline of the hypocephali the Egyptians used in burials, of which Facsimile 2 in the Book of Abraham is an example.
"For some members the Book of Mormon remains unread. Others use it occasionally as if it were merely a handy book of quotations. Still others accept and read it but do not really explore and ponder it. The book is to be feasted upon, not nibbled."

"Strong feelings need not rob disciplined inquiry of merit." John L. Sorenson
"To be known, the truth must be stated, and the clearer and more complete the statement is, the better opportunity will the Holy Spirit have for testifying to the souls of men that the work is true. . . . This must ever be the chief source of evidence for the truth of the Book of Mormon. All other evidence is secondary to this, the primary and infallible. . . . Secondary evidences in support of truth, like secondary causes in natural phenomena, may be of firstrate importance."
