No one can know too much about the Book of Mormon.

*Approach to the Book of Mormon, p. 1*

The Book of Mormon is tough. It thrives on investigation. You may kick it around like a football, as many have done; and I promise you it will wear you out long before you ever make a dent in it.

*Lehi, p. 143*

The Achievement of the Book of Mormon

A century and a quarter ago, a young man shocked and angered the world by bringing out a large book which he set up beside the Bible, not as a commentary or a key to the scriptures, but as original scripture—the revealed word of God to men of old—and as genuine history.

The book itself declares that it is an authentic product of the Near East. It gives [a] full and circumstantial account of its own origin. It declares that it is but one of many, many such books that have been produced in the course of history and may be hidden in sundry places at this day. It places itself in about the middle of a long list of sacred writings, beginning with the patriarchs and continuing down to the end of human history. It cites now-lost prophetic writings of prime importance, giving the names of their authors. It traces its own cultural roots in all directions, emphasizing the immense breadth and complexity of such connections in the world. It belongs to the same class of literature as the Bible, but, along with
a sharper and clearer statement of Biblical teachings, contains a formidable mass of historical material unknown to biblical writers but well within the range of modern comparative study since it insists on deriving its whole cultural tradition, even in details, directly from a specific time and place in the Old World. . . .

The Book of Mormon is God's challenge to the world. It was given to the world not as a sign to convert but as a testimony to convict it. In every dispensation the world must be left without excuse. It is given without reservation or qualification as a true history and the word of God.

"Historicity of the Bible," pp. 9-10

Where else [but in the Book of Mormon] will one find such inexhaustible invention combined with such unerring accuracy and consistency? To put it facetiously but not unfairly, the artist must not only balance a bowl of goldfish and three lighted candles on the end of a broomstick while fighting off a swarm of gadflies, but he must at the same time be carving an immortal piece of statuary from a lump of solid diorite.

In an undertaking like this, merely to avoid total confusion and complete disaster would be a superhuman achievement. But that is not the assignment; that is only a coincidental detail to the main business at hand, which is, with all this consummately skillful handling of mere technical detail, to have something significant to say; not merely significant, but profound and moving and so relevant to the peculiar conditions of our own day as to speak to our ears with a voice of thunder.

"Since Cumorah, p. 159

There is nothing extraneous or afterthought about the religious element in the Book of Mormon, to remove the religious parts of which would be equivalent to removing the rice from a rice pudding. There is really nothing else to it.

"Censoring the Joseph Smith Story," (July 1961), p. 524

It is a surprisingly big book, supplying quite enough rope for a charlatan to hang himself a hundred times. As the work of an imposter it must unavoidably bear all the marks of fraud. It should be poorly organized, shallow, artificial, patchy, and unoriginal. It should display a pretentious vocabulary (the Book of Mormon uses only 3000 words), overdrawn stock characters, melodramatic situations, gaudy and overdone descriptions, and bombastic diction. . . .

Whether one believes its story or not, the severest critic of the Book of Mormon if he reads it with any care at all must admit that it is the exact opposite. . . . It is carefully organized, specific, sober, factual, and perfectly consistent.

Since Cumorah, pp. 373-374

The Book of Mormon and Other Holy Writings —

The first and foremost objection to the Book of Mormon was summed up in the first word of Alexander Campbell's opening blast against it: "Blasphemy!" The first thing that would hit any Christian on opening to the title page was the claim of this book to be nothing less than the word of God—right beside the Bible! . . .

Again the Book of Mormon has the last word. Rare indeed is the Christian scholar today who would maintain that every word declared canonical in the past by committees claiming no inspiration whatever is the absolute word of God or that all the writing given noncanonical status by the same learned conclaves are, when they claim the status of scripture, to be condemned out of hand as fraudulent. That won't do any more. Today religious journals are full of perplexed and controversial articles on "What is Scripture?"

"Howlers in the Book of Mormon," p. 33

The world today has forgotten that the most shocking and offensive thing about the Book of Mormon was what? For years and years, nobody could find any objectionable teachings or anything like that in it. What were they so upset about? It was this: that it presented a completely unfamiliar set of scripture and revelation—a completely new idea of scripture. Nobody ever thought of the scriptures being like that. Another book comes along, and this book tells us a lot about writing, about recording, about handing down traditions, about how the people thought of it. And they said, we have the Bible, and this Bible was a concrete monolithic block written by the hand of God and there was nothing else. And here came the Book of Mormon, not only butting into the picture, but giving a whole new conception of what scripture was, and how it had been composed, and how it had been made, how things were built up.

"Rediscovery of the Apocalypse," p. 1

In three ways the Book of Mormon by implication rejected the conventional ideas of what the Bible is supposed to be: (1) by its mere existence it refuted the idea of a "once-for-all" word of God;
(2) by allowing for the mistakes of men in the pages of scripture it rejected the idea of an infallible book; (3) and by its free and flexible quotations from the Bible it rejected the idea of a fixed, immutable, letter-perfect text.

Since Cumorah, p. 22

The idea of the holy book that is taken away from the earth and restored from time to time, or is handed down secretly from father to son for generations, or hidden up in the earth, preserved by ingenious methods of storage with precious imperishable materials to be brought forth in a later and more righteous generation, is becoming increasingly familiar with the discovery and publication of ever more ancient apocryphal works, Jewish, Christian, and others. But nowhere does the idea find clearer or completer expression than in the pages of the Book of Mormon and the Pearl of Great Price.

"Genesis of the Written Word," p. 43

Mark Twain accuses Joseph Smith of having... "smouched from the New Testament, and no credit given." But since the Book of Mormon was written to be read by people who knew and believed the Bible—indeed, one cannot possibly believe the Book of Mormon without believing the Bible—it is hard to see why a deceiver would strew the broadest clues to his pilfering all through a record he claimed was his own.

But of course what Mark Twain did not know was that ancient writing is formulaic and that no writer was expected to cite chapter and verse for the word-for-word quotations and set expressions which made up his composition. For one thing, there would be no point to citing one's immediate source for an idea or expression since that writer in turn was merely borrowing it from another. That was no more pilfering to the ancient mind than taking words out of the dictionary or thesaurus would be for a modern author. This should be obvious to anyone who has read much of ancient authors in the original—translation, of course, completely effaces the original expressions and makes this kind of investigation clumsy and dubious if not impossible.

Since Cumorah, pp. 127-28

The English Book of Mormon when it quotes the Bible follows the English of the King James version wherever possible, because that happened to be the only official version of the scriptures known to the people for whom the Book of Mormon was translated. In short, today, as in ancient times, people are always preached to from their own Bible.

"New Voices from the Dust," (Feb. 1965), p. 103

Of The Book of Mormon

Just as the New Testament clarified the long misunderstood message of the Old, so the Book of Mormon is held to reiterate the messages of both testaments in a way that restores their full meaning.

It is as if we were completing a jigsaw puzzle. There is a peculiarly shaped blank which calls for a missing piece designated as the stick of Judah. The Old Testament fits easily into the gap. Then there remains an adjacent blank space to be filled by a missing "Stick of Joseph." Naturally the first thing we do is to try to slip the New Testament into it. But turn it and push it and force it as we will, the New Testament simply does not belong there, for it is not the story of "Joseph and his associates" in contradistinction to that of "Judah and his associates," which makes up the Bible. If anything it belongs to the latter class, to the Stick of Judah.

Since the missing piece refuses to be found, the skillful jigsaw artist simply goes ahead and completes the rest of the picture; and then if the missing piece is still lost, he can infer from the shape of the last empty space and from the design and color of the surrounding areas almost exactly what the missing piece should be. This is what we are attempting here. When the Bible commentators failed to supply the missing piece or to agree on what it should look like, we simply continued to work out the puzzle, putting into position every piece we could find that had to do with sticks and covenants. As a result we are now in a position to make some pretty near guesses as to the shape, size, and color of the missing piece to our puzzle—the baffling "Stick of Joseph."

"Stick of Judah," (May 1953), p. 331

Ezekiel... is talking sense when he speaks of the two sticks that become one. It is not merely that the ancients had such sticks but that they used them specifically in the situation described by Ezekiel for a summoning and gathering of the nation and for the establishment of identity and the renewing of contracts. The scattered tribes of Israel are described as apparently lost for good, smashed, dispersed, forgotten, nay, dead—dry bones. This all looks to a far future time, for the dry bones show us not a sick nation, not a dying one, nor even one now dead, but one that has been dead for a long time. That the nations are depicted as scattered far and wide, having lost their identity and disappeared from history, is noted by the commentators—hence the need for a miracle of resurrection, hence the need for a sure means of identification symbolized by the identification sticks.
The "extinct" nations are summoned to the great assembly by the Lord's herald, who takes their marked rods and places them side by side. They fit together perfectly to become one stick as the herald performs the joining before the eyes of all the people (Num. 17:9).

Judah and Joseph are thereby recognized beyond a doubt as parties to the original covenant long after separation and the original unity of the covenant people is thereby restored. The united scepter is then returned to the hand of the king (Ezek. 37:19, 22-44) where it is to remain forever, all outstanding debts, the price of sin and transgression, having at last been paid off and all old scores settled.

"Stick of Judah," (March 1953), p. 152

We can say without hesitation that the first chapter of the Book of Mormon, the Testament of Lehi, has the authenticity of a truly ancient pseudepigraphic writing stamped all over it. It is a well-nigh perfect example of the genre.

"To Open the Last Dispensation," p. 4

The Book of Mormon is, as it often reminds us, a selective history. It deals with small groups of pious believers, intensely conservative by nature and tradition, consciously identifying themselves with their ancestors, Israel in the wilderness of long ago. It was this characteristic tendency of the sectaries to identify themselves with earlier trials and tribulations of Israel that at first made the Dead Sea Scrolls so hard to date. The same situations seem to obtain again and again through history, so that the Kittim of the Scrolls might be the Egyptians, Assyrians, Babylonians, Greeks, or Romans.

Though carrying on in the New World, the Book of Mormon people preserve their ancient culture for centuries, which should not surprise us. Do not the present inhabitants of America speak the English, Spanish, and Portuguese and preserve the customs of the Old World after four hundred years? With this strong cultural carry-over, the Nephites are aware of being special and apart—as the sectaries always are—"a lonesome and a solemn people" is the moving expression of Nephi's brother. And strangely enough, they are peculiarly bound to the written word as are the people of Qumran. One of the most important discoveries of the Book of Mormon was the process and techniques of recording, transmitting, concealing, editing, translating, and duplicating ancient writings. Here is something the world refused to see in the Bible, the most sealed of books, but it has been thoroughly vindicated in the Dead Sea Scrolls.

"Churches in the Wilderness," p. 166

Tests and Evidences

A young man once long ago claimed he had found a large diamond in his field as he was ploughing. He put the stone on display to the public free of charge, and everyone took sides. A psychologist showed, by citing some famous case studies, that the young man was suffering from a well-known form of delusion. An historian showed that other men have also claimed to have found diamonds in fields and been deceived. A geologist proved that there were no diamonds in the area but only quartz. The young man had been fooled by a quartz. When asked to inspect the stone itself, the geologist declined with a weary, tolerant smile and a kindly shake of the head. An English professor showed that the young man in describing his stone used the very same language that others had used in describing uncut diamonds. He was, therefore, simply speaking the common language of his time. A sociologist showed that only three out of 177 florist's assistants in four major cities believed the stone was genuine. A clergyman wrote a book to show that it was not the young man but someone else who had found the stone.

Finally an indigent jeweler named Snite pointed out that since the stone was still available for examination the answer to the question of whether it was a diamond or not had absolutely nothing to do with who found it, or whether the finder was honest or sane, or who believed him, or whether he would know a diamond from a brick, or whether diamonds had ever been found in fields, or whether people had ever been fooled by quartz or glass, but was to be answered simply and solely by putting the stone to certain well-known tests for diamonds.

Experts on diamonds were called in. Some of them declared it genuine. The others made nervous jokes about it and declared that they could not very well jeopardize their dignity and reputations by appearing to take the thing too seriously. To hide the bad impression thus made, someone came out with the theory that the stone was really a synthetic diamond, very skillfully made, but a fake just the same. The objection to this is that the production of a good synthetic diamond 120 years ago would have been an even more remarkable feat than the finding of a real one. Lehi, pp. 136-37

A revealed text in English is infinitely to be preferred to an original in a language that no one on earth could claim as his own. It
frees the members and leaders of the Church as it frees the investigating world from the necessity of becoming philologists or, worse still, of having to rely on the judgment of philologists, as a prerequisite to understanding this great book. At the same time it puts upon the modern world an obligation to study and learn from which that world could easily plead immunity were the book in an ancient language or couched in the labored and pretentious idiom that learned men adopt when they try to decipher ancient texts.

"New Approaches to Book of Mormon Study," (May 1954), p. 308

It is our conviction that proof of the Book of Mormon does lie in Central America, but until the people who study that area can come to some agreement among themselves as to what they have found, the rest of us cannot very well start drawing conclusions... The documents may be already reposing unread in our libraries and archives, awaiting the student with sufficient industry to learn how to use them.

Approach to Book of Mormon, p. 376

Internal Evidence

1. The mere existence of the book is a powerful argument in favor of its authenticity.
2. In giving us a long book, the author forces us to concede that he is not playing tricks.
3. This writer never falls back on the accepted immunities of double meaning and religious interpretations in the manner of the Swedenborgians or the schoolmen. This refusal to claim any special privileges is an evidence of good faith.
4. Shysters may be diligent enough in their way, but the object of their trickery is to avoid hard work and this is not the sort of laborious task they give themselves.
5. Upon close examination all the many apparent contradictions in the Book of Mormon disappear. It passes the sure test of authenticity with flying colors.
6. The style is not that of anyone trying to write well... Here is a book with all the elements of an intensely romantic adventure tale of far-away and long-ago, and the author turns down innumerable chances to please his public!
7. There are no plays on words, no rhetorical subtleties or tricks, no reveling in abstract terms, no esoteric language or doctrine to require the trained interpreter.
8. Whoever wrote the book must have been a very intelligent and experienced person; yet such people in 1830 did not produce books with rudimentary vocabularies. This cannot be the work of any simple clown, but neither can it be that of an able and educated contemporary.
9. The extremely limited vocabulary suggests another piece of internal evidence to the reader. The Book of Mormon never makes any attempt to be clever.
10. Since it claims to be translated by divine power, the Book of Mormon also claims all the authority—and responsibility—of the original text. The author leaves himself no philological loopholes, though the book, stemming from a number of nations and languages, offers opportunity for many of them.

"New Approaches to Book of Mormon Study," (Jan. 1954), pp. 30-32; ellipses omitted in this summary.

External Evidence

1. The Book of Mormon must make clear and specific statements about certain concrete, objective things.
2. Other sources, ancient and modern, must make equally clear and objective statements about the same things, agreeing substantially with what the Book of Mormon says about them.
3. There must be clear proof that there has been no collusion between the two reports, i.e., that Joseph Smith could not possibly have knowledge of the source by which his account is being “controlled” or of any other source that could give him the information contained in the Book of Mormon.  "New Approaches to Book of Mormon Study," (Jan. 1954), p. 32

Circumstantial Evidence

Entirely apart from the contents of the Book of Mormon and the external evidences that might support it, there are certain circumstances attending its production which cannot be explained on grounds other than those given by Joseph Smith. These may be listed briefly:

1. There is the testimony of the witnesses.
2. The youth and inexperience of Joseph Smith at the time when he took full responsibility for the publication of the book—proof (a) that he could not have produced it himself and (b) that he was not acting for someone else, for his behavior at all times displayed astounding independence.
3. The absence of notes and sources.
4. The short time of production.
5. The fact that there was only one version of the book ever published. This is most significant. It is now known that the Koran, the only book claiming an equal amount of divine inspiration and accuracy, was completely re-edited at least three times during the lifetime of Mohammed.
6. This brings up the unhesitating and unchanging position of Joseph Smith regarding his revelations. . . . From the day the Book of Mormon came from the press, Joseph Smith never ceased to spread it abroad, and he never changed his attitude towards it. What creative writer would not blush for the production of such youth and inexperience twenty years after? What imposter would not lie awake nights worrying about the slips and errors of this massive and pretentious product of his youthful indiscretion and raggery?

Yet, since the Prophet was having revelations all along, nothing would have been easier, had he the slightest shadow of a misgiving, than to issue a new, revised, and improved edition, or to recall the book altogether, limit its circulation, claim it consisted of mysteries to be grasped by the . . . initiated alone, say it was to be interpreted only in a "religious" sense, or supersede it by something else. The Saints who believed the Prophet were the only ones who took the book seriously anyhow.

7. There has never been any air of mystery about the Book of Mormon. There is no secrecy connected with it at the time of its publication or today. There is a complete lack of sophistry or policy in discussions of the Book of Mormon. It plays absolutely no role in the history of the Church as a pawn. There is never any dispute about its nature or contents among the leaders of the Church. There is never any manipulating, explaining, or compromise. The book has enjoyed [unrestricted] sale at all times.

8. Finally, though the success of the book is not proof of its divinity, the type of people it has appealed to, sincere, simple, direct, highly un hysterical and nonmystical, is circumstantial evidence for its honesty. It has very solid supporters.

. . . When one considers that any one of the above arguments makes it very hard to explain the Book of Mormon as a fraud, one wonders if a corresponding list of arguments against the book might not be produced. For such a list one waits with interest but in vain. At present the higher critics are scolding the Book of Mormon for not talking like the dean of a divinity school. We might as well admit it, the Victorian platitudes are simply not there, but what a fatal blow to the Book of Mormon it would be if they were! "New Approaches to Book of Mormon Study," (Feb. 1954), p. 88

Relationship to Other Records

The idea that the Book of Mormon was simply a product of its time may be a necessary fiction to explain it but it is a fiction none the less. If they may be trusted in nothing else, the voluminous writings of the anti-Mormons stand as monumental evidence for one fact: that Mormonism and the Book of Mormon were in no way a product of the society in which they arose.

"Mixed Voices," (July 1959), p. 565

In trespassing on scientific grounds or rather, in timidly peeping over the fence, we are only seeking enlightenment. We have heard so often that "science" has disproved, nay "disemboweled," the Book of Mormon, that we are naturally curious to have a look at some of the more spectacular havoc. Where is it?

We have tiptoed into the archaeology museum and there found nothing that could not be interpreted many ways. We have entered the house of the anthropologists, and there found all in confusion—and the confusion is growing. We have consulted with the more exact or authentic scientists and found them surprisingly hesitant to commit themselves on the Book of Mormon. A definitive refutation must rest on definitive conclusions, and of such conclusions scientists are becoming increasingly wary. Since Cumorah, pp. 257-58

. . . Today the literary condemn the Book of Mormon as not being up to the standards of English literature that appeal to them, social scientists condemn it because it fails to display an evolutionary pattern of history, and the exponents of pure truth are disgusted with it because it entirely ignores the heritage of medieval scholasticism and fails to display the Victorian meliorism which should be the mark of any nineteenth-century history of humanity.

Approach to the Book of Mormon, p. 5
Of All Things

The writer of 1 Nephi was confronted by a hundred delicately interrelated problems of extreme difficulty. The probability of coming up with a plausible statement by mere guesswork once or twice is dim enough, but the chances of repeating the performance a hundred times in rapid succession are infinitely remote. The world through which Lehi wandered was to the westerner of 1830 a quaking bog without a visible inch of footing, lost in impenetrable fog; the best Bible students were hopelessly misinformed even about Palestine.

Lehi, p. 132

1 Nephi cannot possibly be explained on the grounds of mere coincidence. To illustrate this, let the reader make a simple test. Let him sit down to write a history of life, let us say, in Tibet in the middle of the eleventh century A.D. Let him construct his story wholly on the basis of what he happens to know right now about Tibet in the eleventh century—that will fairly represent what was known about ancient Arabia in 1830, i.e. that there was such a place and that it was very mysterious and romantic.

In composing your Tibetan fantasy you will enjoy one great advantage: since the canvas is an absolute blank, you are free to fill it with anything that strikes your fancy....

But... we must insist that you scrupulously observe a number of annoying conditions.

(1) You must never make any absurd, impossible, or contradictory statements.
(2) When you are finished, you must make no changes in the text—the first edition must stand forever.
(3) You must give out that your “smooth narrative” is not fiction but true, nay sacred history.
(4) You must invite the ablest orientalists to examine the text with care and strive diligently to see that your book gets into the hands of all those most eager and most competent to expose every flaw in it.

The “author” of the Book of Mormon observes all these terrifying rules most scrupulously.

Lehi, pp. 133-35

Of The Book of Mormon

pitfalls into which even the best scholars were sure to fall. There is no point at all to the question: Who wrote the Book of Mormon? It would have been quite as impossible for the most learned man alive in 1830 to have written the book as it was for Joseph Smith.

Lehi, pp. 138-39

 Few people realize that in Joseph Smith’s day no really ancient manuscripts were known. Egyptian and Babylonian could not be read. The oldest literature available was the Greek and Latin classics, preserved almost entirely in bad medieval copies no older than the Byzantine and Carolingian periods.

“Genesis of the Written Word,” p. 2

There is only one direction from which any ancient writing may be profitably approached. It must be considered in its original ancient setting and in no other. Only there, if it is a forgery, will its weakness be revealed, and only there, if it is true, can its claims be vindicated.

Approach to the Book of Mormon, p. 6

To the trained eye every document of considerable length is bound to betray the real setting in which it was produced. This can be illustrated by something Martin Luther wrote two days before his death: “No man can understand the Bucolics and Georgics of Virgil who has not been a herdsman or a farmer for at least five years. And no one can understand Cicero’s letters, I maintain, who has not been concerned with significant affairs of state for twenty years. And no one can get an adequate feeling for the scriptures who has not guided religious communities by the prophets for a hundred years.”

What is the world of experiences and ideas that one finds behind the Book of Mormon? What is the real Sitz im Leben [milieu]? We can start with actual experiences, not merely ideas, but things of a strictly objective and therefore testable nature. For example, the book describes in considerable detail what is supposed to be a great earthquake somewhere in Central America, and another time it sets forth the particulars of ancient olive culture. Here are things we can check up on; but to do so we must go to sources made available by scholars long since the days of Joseph Smith. Where he could have learned all about major Central American earthquakes or the fine points of Mediterranean olive culture remains a question.

Since Cumorah, pp. 261-62
If [the Jaredite story] is fiction, it is fiction by one thoroughly familiar with a field of history that nobody in the world knew anything about in 1830. No one is going to produce a skillful forgery of Roman history, for example, unless he actually knows a good deal of genuine Roman history. So if Ether is a forgery, where did its author get the solid knowledge necessary to do a job that could stand up to five minutes of investigation? I have merely skimmed the surface... but if my skates are clumsy, the ice is never thin. Every page is loaded with matter for serious discussion—discussion that would fizzle out promptly in the face of any palpable absurdity.

Lehi, pp. 261-62

The first rule of historical criticism in dealing with the Book of Mormon or any other ancient text is, never oversimplify. For all its simple and straightforward narrative style, this history is packed as few others with a staggering wealth of detail that completely escapes the casual reader. The whole Book of Mormon is a condensation, and a masterly one. It will take years simply to unravel the thousands of cunning inferences and implications that are wound around its most matter-of-fact statements. Only laziness and vanity lead the student to the early conviction that he has the final answers on what the Book of Mormon contains.

Lehi, pp. 238-39

It is not enough to show, even if [critics] could, that there are mistakes in the Book of Mormon, for all humans make mistakes. What they must explain is how the "author" of the book happened to get so many things right.

Lehi, pp. 137-138

Contemporary Relevance

I intend to take Moroni as my guide to the present world situation. Why him? Moroni and his father are the principal, definitive editors of the Book of Mormon. They not only compiled and edited; they went through and picked out things they felt would be important for us; then they evaluated that and applied it to us and explained everything to us.... And both Moroni and his father were concerned with... the questions... of prosperity and security—the great inseparably related issues of wealth and war.

"Gifts," p. 3

In my youth I thought the Book of Mormon was much too preoccupied with extreme situations, situations that had little bearing on the real world of everyday life and ordinary human affairs. What on earth could the total extermination of nations have to do with life in the enlightened modern world?

Today no comment on that is necessary. Moroni gives it to us straight: This is the way it was before, and this is the way it is going to be again, unless there is a great repentance.

"Prophetic Book of Mormon," p. 17

Readers of the Book of Mormon often express disgust or at least weariness and impatience at having to wade through 170 pages of wars and alarms in a religious book. This writer must confess to having suffered from the same prejudice. After surviving three years of military intelligence at every level from company to army group, with frequent visits to SHAEF [Supreme Headquarters of the Allied Expeditionary Forces] on the one hand and a muddy foxhole on the other, and after reading and writing thousands of reports on enemy dispositions and tactics from company sector to army front, we have always been inclined to rush through the military parts of the Book of Mormon as painful reminders of an unpleasant past. In twenty years of writing about the Book of Mormon we have studiously ignored the war stories. But that is where we were wrong.

The whole point of Alma's (or rather Mormon's) studies in "the work of death" as he calls it, is that they are supposed to be revolting. They are meant to be painful.

Since Cumorah, p. 328

In the Book of Mormon, the very questions which now oppress the liberal and fundamentalist alike, to the imminent overthrow of their fondest beliefs, are fully and clearly treated. No other book gives such a perfect and exhaustive explanation of the eschatological problem. Here we learn how the Christian and Jewish traditions fit into the world picture, and how God's voice has been from the very beginning to all men everywhere. Here alone one may find a full setting forth of the exact nature of scripture and of the vast range and variety of revelation. Here you will find anticipated and answered every logical objection that the intelligence and vanity of men even in this sophisticated age has been able to devise against the preaching of the word. And here one may find a description of our own age so vivid and so accurate that none can fail to recognize it.

"Historicity of the Bible," p. 11

The Book of Mormon is the history of a polarized world in which two irreconcilable ideologies confronted each other. [It] is
addressed explicitly to our own age, faced by the same predicament and the same impending threat of destruction. It is a call to faith and repentance couched in the language of history and prophecy; but above all, it is a witness to God's concern for all his children and to the intimate proximity of Jesus Christ to all who will receive him.

When a person suffering from diabetes consults a doctor, the doctor does not prescribe a treatment for cancer, even though cancer is today considered by far the more dangerous disease. What we read about in the Book of Mormon is the Nephitic disease—and we have it!

We should be glad that we do not have the much worse diseases that infect some other societies and that there is greater hope for us. But diabetes if neglected can kill one just as dead as cancer. After all, the Nep-hitans were terminated. We can be most grateful, therefore, regardless of how sick others may be, that God in the Book of Mormon has diagnosed our sickness for our special benefit and prescribed a cure for us.

It is into our hands that the Book of Mormon has been placed. After 140 years the Russians, Portuguese, and Turks do not even know of its existence. Plainly it is meant for us, as it reminds us many times; it is the story of what happened to the Nephitans—and we are the Nephitans: "It must needs be that the riches of the earth are mine to give; but beware of pride, lest ye become as the Nephitans of old" (D&C 38:39). It is the fate of the Nephitans, not of the Lamanites, Greeks, or Chinese, that concerns us; and [their] doom was brought on them by pride which in turn was engendered by the riches of the earth.

There are four portentous danger signals in the Book of Mormon, three internal and one external. The external threat is of course the Lamanites; the internal danger signals are: (1) the accumulation of wealth, (2) the appearance on the scene of ambitious men, and (3) the presence in the society of "secret combinations to get power and gain." Since Cumorah, pp. 390-91

Since the first step in the Nephitic disease is exposure to wealth, the only sure cure or prevention would seem to be strict avoidance of wealth. But is it any pleasanter to die of anemia than of cancer? One can avoid almost any disease by giving up eating altogether, but there must be a better way.

Of The Book of Mormon

One of Satan's favorite tricks is to send ailing souls after the wrong cure, leading them by his false diagnosis to "strain at a gnat and swallow a camel." In this he is ably abetted by those physicians who would force us to choose between their own violent, extreme, and sometimes fantastic remedies and a sure and agonizing death. Either accept the Wackeley Cure, they say, or resign yourselves to a frightful and certain end. No other alternative is conceivable. And so by instilling fear with one hand and offering an only hope with the other such practitioners gain a following.

But the Book of Mormon is against violent remedies. It prescribes the gentlest of treatments—charity, accompanied by strong and steady doses of preaching of the gospel. The final analysis of Mormon and Moroni was that the fatal weakness of the Nephitans was lack of charity. And whenever the worst epidemics of Nephite disease were brought under control and even stamped out, it was always through a marvelous display of charity and forbearance by such great souls as Alma, Ammon, Moroni, or Nephi or his father Helaman, and specifically through the preaching of the word, which Alma knew was more effective than any surgery.

Since Cumorah, p. 430

The wickedness and folly of Israel do not consist of indolence, sloppy dressing, long hair, nonconformity (even the reading of books), radical, liberal, unrealistic ideas and programs, irreverence toward custom and property, contempt for established idols, etc.

The very wickedest people in the Book of Mormon are the Zoramites. A very proud, independent, courageous, industrious, enterprising, patriotic, prosperous people who attended strictly to their weekly religious duties with the proper observance of dress standards, thanking God for all he had given them and bearing testimony to his goodness. They were sustained in all their doings by a perfectly beautiful self-image.

Well, what is wrong with that? . . . The Jews observed all the rules that Moses gave them with strictest regularity—and yet: "They cry unto me" (as they should) and yet—they are really thinking of something else. "Behold, O my God, their costly apparel . . . and all their precious things . . . ; their hearts are set upon them, and yet they cry unto thee and say—We thank thee, O God, for we are a chosen people." (Alma 31:27).

"Great Are the Words of Isaiah," p. 198

I have always thought in reading the Book of Mormon, "Woe to the generation that understands this book!" To our fathers, once
the great persecutions ceased, the story of the Nephites and the Lamanites was something rather strange, unreal, and faraway—even to the point of being romantic. But now with every passing year this great and portentous story becomes more and more familiar and more frighteningly like our own.

World and the Prophets, pp. 195-96

God was their "DEW-line," their radar, and warning system, and that saved them the need of constant and costly vigilance on all fronts, to say nothing of expensive and wasteful war-plans and war-games. This was Moroni's policy of preparedness. . . . The keystone of all defense was unity at home. Since Cumorah, p. 343

Why do you think the Book of Mormon was given to us? Angels do not come on trivial errands, to deliver books for occasional light reading to people whom they do not really concern. The matter in the Book of Mormon was selected, as we are often reminded, with scrupulous care and with particular readers in mind. For some reason there has been chosen for our attention a story of how two previous civilizations on this continent were utterly destroyed and why.

Lest the modern reader of this sad and disturbing tale from the dust choose to pass lightly over those fearful passages that come too close to home, the main theme is repeated again and again so that almost any Latter-day Saint child can tell you what it is: The people were good so God made them prosperous, and then they were bad and got wiped out. What few can tell you is the steps by which the fatal declension took place, without which the story is jejune and naive.

"Freemen and Kingmen," pp. 15-16

An extremely important lesson [is] driven home repeatedly in the Book of Mormon, that righteousness does not consist of being identified with this or that nation, party, church, or group. When you find a particularly wicked society in the story, look back a few pages and you will probably find that not many years before those same people were counted righteous. Or, when you find a particularly godless and ferocious lot of Lamanites, if you look a few pages ahead you may find them among the most blessed and favored of God's people.

"Freemen and Kingmen," p. 4

Repeated echoes from the remote past keep reminding us that the office and calling of the bee was to bring about the stirrings of life, reviving the biological cycle in a world that had been totally ravaged by cosmic forces of destruction. Is, then, Deseret waiting in the wings, held in reserve against the day, soon to come, when its salutary services will be required again?

From the first, the symbol of the bee captivated the imagination of the Latter-day Saints in their migrations and their settlements. The emblematic hive became the seal of the territory and state and adorned every important edifice within the vast expanse of "our lovely Deseret." Finally, by what strange coincidence does the History of the Church end with the sign of the bee? After the martyrdom of Joseph and Hyrum Smith, "the bodies . . . were removed . . . at Emma's request, to near the Mansion house, and buried side by side, and the bee house was then moved and placed over their graves."

Abraham in Egypt, pp. 244-45

Believing the Book of Mormon

How could anyone put up a halfway decent defense of the Book of Mormon without being prejudiced in its favor? There is nothing wrong with having and admitting two sides in a controversy. By definition every theory is controversial, and the better the theory the more highly controversial. There can be no more constructive approach to a controversial issue like this one than to have each side present the evidence which it finds most convincing, always bearing in mind that authority is not evidence and that name-dropping is as futile as name-calling. Sweeping statements and general impressions are sometimes useful in the process of getting one's bearings and taking up a position, but they cannot serve as evidence because they are expressions of personal impressions which are nontransferable. . . .

The evidence that will prove or disprove the Book of Mormon does not exist. When, indeed, is a thing proven? Only when an individual has accumulated in his own consciousness enough observations, impressions, reasonings, and feelings to satisfy him personally that it is so. The same evidence which convinces one expert may leave another completely unsatisfied; the impressions that build up the definite proof are themselves nontransferable.

Since Cumorah, p. viii

The Book of Mormon like the Bible is an organic whole. We are asking the literary experts to produce just one modern work which resembles it as such. There are, we believe, plenty of ancient
parallels; but if the Book of Mormon is a fraud, a cheat, a copy, a theft, etc., as people have said it is, we have every right to ask for a sampling of the abundant and obvious sources from which it was taken. Ethan Smith’s View of the Hebrews is no more like the Book of Mormon than a telephone directory. All attempts to find contemporary works which the Book of Mormon even remotely resembles have been conspicuous failures.

So it has been necessary to explain the book as a work of pure and absolute fiction, a nonreligious, money-making romance. But one need only read a page of the book at random to see that it is a religious book through and through, and one need only read the title page of the first edition to see that it is given to the world as holy scripture, no less. Here we come to the crux of the whole matter.

The whole force and meaning of the Book of Mormon rests on one proposition: that it is true. It was written and published to be believed.

People who believe the Book of Mormon (and the writer is one of them) think it is the most wonderful document in the world. But if it were not true, the writer could not imagine a more dismal performance.

There is nothing paradoxical in this. As Aristotle noted, the better a thing is, the more depraved is a spurious imitation of it. An imitation nursery rhyme may be almost as good as an original, but a knowingly faked mathematical equation would be the abomination of desolation. Curves and equations derive all their value not from the hard work they represent or the neatness with which they are presented on paper, but from one fact alone—the fact that they speak the truth and communicate valid knowledge. Without that they are less than nothing. To those who understand and believe that E=mc² [Einstein equation: Energy equals mass times the speed of light squared], that statement is a revelation of power. To those who do not understand or believe it (and there are many!) it is nothing short of an insolent and blasphemous fraud. So it is with the Book of Mormon, which if believed is a revelation of power but otherwise is a nonsensical jumble.

It will be said that this merely proves that the greatness of the Book of Mormon lies entirely in the mind of the reader. Not entirely! There are people who loathe Bach and can’t stand Beethoven. It was once as popular among clever and educated people to disdain Homer and Shakespeare as barbaric as it is now proper to rhapsodize about them in Great Books clubs. Different

readers react differently to these things—but they must have something valid to work on.

We are not laying down rules for taste or saying that the Book of Mormon is good because some people like it or bad because others do not. What we are saying is that the Book of Mormon, whatever one may think of it, is one of the great realities of our time, and that what makes it so is that certain people believe it. Its literary or artistic qualities do not enter into the discussion. It was written to be believed. Its one and only merit is truth. Without that merit, it is all that nonbelievers say it is. With the merit, it is all that believers say it is.

"New Approaches to Book of Mormon Study," (March 1954), p. 170

Our prophets spare us the usual clichés about higher spiritual values, the brotherhood of man, and how our problems would be solved if everybody only did this or that. The way out is not to be found in the self-consoling merry-go-round of philosophy, the heroic self-dramatization of literature and art, or the self-reassuring posturings of science and scholarship. Men have tried everything for a long time and the idea that their condition has improved rests entirely on an imaginary reconstruction of the past devised to prove that very proposition. Not that the theory may not be right, but at present we just don’t know; and for a world in as dire a predicament as ours that can guarantee no long centuries of quiet research ahead and seems to need some quick and definite assistance if it is to survive at all, it might pay to consider what Mormon and Moroni have to offer.

If mankind is to get any real help it must come from outside, and it does. First of all, angels, yes, angels, must come to explain and establish things . . . .

This is not a handing down of testimony, for each of these messengers calls upon the others to seek testimony for themselves by faith and prayer; there are no second or third-hand testimonies . . . .

Is there anything to this? You will never find out, say our prophets, if you begin denying everything . . . . All that Mormon and Moroni ask of the reader is, don’t fight it, don’t block it, give it a chance! If it does not work, then you can forget it; but it is not asking too much that men invest a little of their time and effort in an enterprise in which they stand to win everything and lose nothing—especially now, when so many know that as things are they stand to win nothing. Let the hesitant consider that the way of faith is the
way of science, too: "Ye receive no witness until after the trial of your faith," says Moroni (Eth. 12:6). First we "make the experiment" (Alma 32:27) in which it is fair game to hope for results, since without hope nobody would go through with the thing at all (Moro. 1:22), and then we get our answers. That is the way it is done in the laboratory. What could be fairer?  

*Since Cumorah, pp. 39-41*
We hold Joseph Smith to account. His book enjoys no immunity to the severest tests and asks for none. The study of forged documents is by no means in its infancy; it was in fact the principal delight of Renaissance scholarship. It has been known for centuries that the easiest of all forgeries to test and detect are long historical documents, and that it is never necessary to go beyond the inner inconsistencies of such documents to expose their fraudulence. So here is the Book of Mormon: if its title page is not telling the truth, it is a big shallow, clumsy fraud, and there are hundreds of scholars in the world quite capable of refuting its claims within the hour. But whoever offers to undertake the job must be willing to submit his claims and arguments to the same severe criticism that it is his business to mete out. With this understanding the Book of Mormon may some day enjoy the serious critical examination it deserves. SIN 444.

HISTORY. A century of bound periodicals in the stacks will tell the enquiring student when scholars first became aware of the various elements that made up the super-pattern, but Joseph Smith knew about them all, and before the search ever began he showed how they are interrelated. In the documents he has left us, you will find the central position of the Coronation, the tension between Matriarchy and Patriarchy, the arcane discipline for transmitting holy books through the ages, the pattern of cycles and dispensations, the nature of the Mysteries, the great tradition of the Rekhabites or sectaries of the desert, the fertility rites and sacrifices of the New Year with the humiliation of the kind and the role of substitute, etc. INT 130.

it is fiction

As with the Lehi story, if this is fiction, by one thoroughly familiar with a field of history that nobody in the world knew anything about in 1830. No one is going to produce a skillful forgery of Roman history, for example, unless he actually knows a good deal of genuine Roman history. So if Ether is a forgery, where did its author get the solid knowledge necessary to do a job that could stand up to five minutes of investigation? . . . . If my skates are clumsy, the ice is never thin. Every page is loaded with matter for serious discussion—discussion that would fizzle out promptly in the face of any palpable absurdity. IDWJ 261-262.

What are the chances of the many parallels between the Lachish letters and the opening chapter of the Book of Mormon being the product of mere coincidence?
1. First consider the fact that only one piece of evidence could possibly bring us into the Lehi picture, and that one piece of evidence happens to be the ONLY first-hand writing surviving from the entire scope of Old Testament history. Lehi's story covers less than 10 years in the 1000-year history of the Book of Mormon, and the Lachish Letters cover the same tiny band of a vast spectrum—and they both happen to be the same ten years!
2. Not only in time but in place do they fit neatly into the same narrow slot; and the people with which they deal also belong to the same classes of society and are confronted by the same peculiar problems.
3. With the Book of Mormon account being as detailed and specific as it is, it is quite a piece of luck that there is nothing in the Lachish Letters that in any way CONTRADICTS its story—that in itself should be given serious consideration. Is it just luck?
4. Both documents account for their existence by indicating specifically the techniques and usages of writing and recording in their day, telling of the same means of transmitting, editing and storing records.

-1-
5. The proximity of Egypt and its influence on writing has a paramount place in both stories.
6. Both stories confront us with dynastic confusion during a transition of kingship.
7. Both abound in proper names in which the -yahu ending is prominent in a number of forms.
8. In both the religious significance of those names gives indication of a pious reformist movement among the people.
9. In both the prophets in the land make trouble.
10. Everybody is fleeing and hiding or chasing.
11. The Rekhabite background of the desert sectaries is clearly in evidence.
12. Family troubles caused by political and economic tension are conspicuous.
13. The basic conflict of materialist and spiritual is seen in the peculiar status of the piggeah, and visionary man, who lacks good sense.
14. And why in both stories do they flee towards Egypt, instead of in the other direction?
15. The callings and doings of Laban and Jaush present an astonishing parallel.
16. The atmosphere of tension and danger is sustained in both stories—doings by night.
17. Nedabyahu fits the character of Mulek, whose name gives away the whole thing. DAR 18

Book of Mormon Criticism. It is the inalienable right of every questioned document, as of every accused person, to be represented by competent counsel, heard by an impartial jury, and sentenced by a qualified judge, being convicted or acquitted only on evidence and not on hearsay. To expect such extravagant justice for the Book of Mormon is to ask for the moon. Counsel for the defense often does the client more harm than good and is automatically branded as prejudiced merely by taking the job; and where will one find an impartial jury, a disinterested judge, or a willingness to test the Book of Mormon on its merits and not on the authority of wild and conflicting rumors about the manner of its origin? Still, however faint the chances of a fair trial may be, even that book has a right to its day in court, if only on the hazard, that it may be a genuine after all.
Has the Book of Mormon ever been given a fair hearing? From the statements of policy which we are about to quote it will be quite apparent that it most definitely has not. For such a procedure would require a perfectly straight-faced examination of its claims as if they were valid! . . . The dice are always loaded before the game begins: It is not the Book of Mormon, but the Angel Moroni who is on trial. MIX 145.

The vast depth and breadth of the grab-bag guarantee that our Book of Mormon investigators will never run out of parallels and analogies which they may hail as significant or not as they choose. But is also guarantees that none of them will ever have the last word. To the end their ideas about the Book of Mormon remain strictly their own, and they are welcome to them. But any pretense to scientific or scholarly finality under the circumstances is but an illusion. Our poorly trained scholars, satisfied that modern science has emancipated them from old methods and chores, are quite unaware that the critics of an earlier day were just as well-educated and emancipated as they, and that they are only repeating in their shallow researches what has already been done by men of greater diligence and authority—and duly marked off as wasted effort. MIX 856.
It is the very extravagance of its claims that makes it so deserving of the respect which is denied it. The outrageous daring of its title page is the very thing that should whet the appetite of a real scholar: here is a book that is asking for a fight, so to speak, and if it is as flimsy as it looks at first glance any competent schoolman should have little trouble polishing it off in an hour of so. SIN vi

... The Book of Mormon cuts a furrow through everything that's been done before. It plows right through all our old concepts. RED 3.

Critics may be permitted at this late date to try their hand at winning friends and influencing people by telling the Mormons of today that they are just ordinary folk with an ordinary church. But to say that such was also the case in the days of Joseph Smith and Brigham Young is neither honest nor sporting. The genial and forced camaraderie of some of the present-day critics of Mormonism is that of the man who finds it easier to pick your pocket by affectionately looking arms with you than by hitting you over the head. The new humane approach is simply an obvious maneuver to rob the Church of a glorious history and to play down every remarkable circumstance of its origin. When it reaches the point of being told that while the Book of Mormon may seem very strange to us, to the contemporaries of Joseph Smith it "would scarcely seem fanciful, possibly not even novel," it is high time to protest. For even the most superficial acquaintance with the literature will show that the Book of Mormon was as baffling, scandalizing, and hated a book in the first week of its appearance as it has ever been since. The idea that the Book of Mormon was simply a product of its time may be a necessary fiction to explain it but it is a fiction none the less. If they may be trusted in nothing else, the voluminous writings of the anti-Mormons stand as monumental evidence for one fact: that Mormonism and the Book of Mormon were in no way a product of the society in which they arose. SIN 531, 565.

If scholarship has any obligation to society to protect the layman from predatory quacks and imposters, no more urgent occasion or perfect opportunity for the exercise of true learning can be imagined than that offered by the bold, uncompromising challenge of the Book of Mormon. If it is weak, it should have been knocked over long ago; if it can't be knocked over, the public should be told as much. As long as it stands, it is a standing rebuke to scholarship. MIX 147.

Instead of the vigorous onslaught that the Book of Mormon hypothesis invites and deserves, it has elicited only a long monotonous drizzle of authoritarian denunciation, the off-hand opinions of impatient scholars whose intelligence and whose official standing will not allow them to waste a moment more than is necessary to write off an imposture so obviously deserving of contempt. SIN v

Where will you find another work remotely approaching the Book of Mormon in scope and daring? It appears suddenly out of nothing—not an accumulation of 25 years like the Koran, but a single staggering performance, bursting on a shocked and scandalized world like an explosion, the full-blown history of an ancient people, following them through all the trials, triumphs, and vicissitudes of a thousand years without a break, telling how a civilization originated, rose to momentary greatness, and passed away, giving due attention to every phase of civilized history in a densely
compact and rapidly moving story that interweaves dozens of plots with an inexhaustible fertility of invention and an uncanny consistency that is never caught in a slip or contradiction. We respectfully solicit the name of any student or professor in the world who could come within ten thousand miles of such a performance. As a sheer tour-de-force there is nothing like it. The theory that Joseph Smith wrote the Book of Mormon simply will not stand examination. SIN 156.

In your Tibetan epic you might get something right by happy accident once in a while but don't expect it. You may console yourself by turning to any good historical novel dealing with the ancient world and marking with a red pencil every anachronism, incongruity, and inaccuracy in the book. The result is carnage, but be merciful! To realize what difficulties confront the creative historian, one has but to contemplate the laborious production of the Book of Mormon's latest critics. It was all too easy for the present author, lacking the unfair advantage of either wit or learning, to show where Mrs. Brodie in composing a history of events but a hundred years old contradicted herself again and again. LDWJ 133-135.

RELIGIONS AND THE BOOK OF MORMON. Perhaps the most remarkable thing about the Book of Mormon and the Pearl of Great Price is the way they knocked the walls out of the narrow religious edifice of Western man of the early nineteenth century. Without them Mormonism might well be charged, as it has been, with being nothing but a segment of a narrow isolated sub-section of Protestant Christianity. With them, it breaks into the Big Picture in the grand manner, for while one of these books takes us far away in time and place as it is possible to get in human history, showing God's dealings as it were with men of another world, the other by choosing an Egyptian provenance cuts for us the largest possible slice of the religious experience of the race.

O, ye of little knowledge! -- the trouble with the little picture is that one can never be sure of it. It is outlined by the areas that surround it, and if one ignores them, the lapidary perfection of the small picture is little more than a glorified doodling.

Even if an Egyptologist were to fly through time and live among the ancient Egyptians we would still have no guarantee of his capacity to "think Egyptian." It is impertinent to claim mastery of a mode of thought when no control exists to confirm or refute our claims. NEP 87 (XXIX)

To say that the young fanatic Joseph Smith succeeded in separating revivalism from emotionalism makes about as much sense as to talk of separating Romanism from Rome or separating the front of a piece of paper from the back. Calvinism and revivalism "without either the stress on human depravity of the former or the excessive emotionalism of the latter" are simply Hamlet with Hamlet left out. SIN 592

To write a history of what could have happened at the very beginning of recorded history would have been as far beyond the scope of any scholar living in 1830 as the construction of an atom bomb would have been. LDWJ 285.

...the discovery of the Elephantine documents in 1925 showed that colonies of Jews actually did flee into the desert in the manner of Lehi, during his lifetime, and for the same reasons; arriving in their new home far up the Nile, they proceeded to build a replica of Solomon's Temple, exactly as Lehi did upon landing in the New World. Both of these oddities, and especially the latter, were once considered damning refutations of the Book of Mormon. DAR 6.

-4-
The great boldness and originality of writings attributed to Joseph Smith are displayed in their full scope and splendor in the account, contained in what is called the Book of Third Nephi in the Book of Mormon, of how the Lord Jesus Christ after his resurrection visited some of his "other sheep" in the New World and set up his church among them. It would be hard to imagine a project more dangerous to life and limb or perilous to the soul than that of authorizing and recommending to the Christian world as holy scripture writings purporting to contain an accurate account of the deeds of the Lord among men after his resurrection, including lengthy transcripts of the very words he spoke. Nothing short of absolute integrity could stand up to the consequences of such daring in 19th Century America. We know exactly how his neighbors reacted to the claims of Joseph Smith, and it was not as it has become customary to insist with the complacent or sympathetic tolerance of "Yorkers" to whom such things were everyday experience: nothing could equal their indignation and rage. CHI 1.

To fill the qualifications of the Stick of Joseph we must have, then,
1) a writing,
2) compounded of the doings of the descendants and associates of Joseph, (not Judah):
3) it must be held in the hand of Ephraim, who is of Joseph, not Judah;
4) it must be much like the Bible, the Stick of Judah, so much so that the two will fit together perfectly like two parts of a single tally-stick;
5) it must be brought forth long after the scattering of Israel, at a time when "the whole house of Israel" shall say "our bones are dried, and our hope has perished; we are destroyed!"
6) it must go forth as a summons "before their eyes" at that time when the Lord sets his hand to "take the children of Israel from among the heathen, whether they be gone . . . ." "
7) the bringing together of the two documents will reverse the process described in Zechariah, by which covenants between these two rods were "cut in two," for as all commentators agree, the joining of the sticks means the re-establishment of the old covenants between them.

In the Book of Mormon we have a document that fulfills all these qualifications, and even the Doctrine and Covenants and Pearl of Great Price may enter into the picture, for they are all of Joseph, are all given into the hand of Ephraim to propagate and defend, and are all bound together as "one stick" with the Book of Mormon. STI 338.

If the historical part of the book of Ether were to be put forth to the world as the translation of some text found, let us say, in the Cave of the Thousand Buddhas, the experts on early Asia might think it a work of fiction but would find nothing in it, barring the strange proper names, to make them doubt that it reflected a genuine ancient culture. If you want to be very cautious, you might say there is very little in it that would annoy the expert. But bearing in mind that Asiatic studies are still in embryo, and considering the condition under which this work was published, and the fabulously remote probability of the writer's getting anything right at all, I think no further credentials are necessary to establish the authenticity of the book, which repeatedly claims to be reporting the ways of very early Asiatics. The book of Ether, like First Nephi, rings the bell much too often to represent the marksmanship of a man shooting at random in the dark. LDWJ 266.
But now we come to the crux of the matter for Latter-day Saints. Can the sticks of Ezekiel, along with everything else they represent, be understood to be books? Strictly speaking, they were nothing else. A book, says Webster, is "specifically: A formal written document; esp., a deed of conveyance of land; a charter." The tribal rods were just that, no matter how brief the writing on them, while the whole Old Testament, in spite of its length and complexity, is a "book" in exactly the same sense: a "testament," a single binding legal document. STI 152.

The correctest book in the world is the one that will be found to contain the fewest untrue statements after all the books in the world have been checked and compared. Of course, no one can know today which book that will be, unless one knows by revelation. But such a statement made about the Book of Mormon by its translator invites the most searching examination. SIN 8.

The Book of Mormon in structure and design is every bit as complicated, involved, and ingenious as the works of a Swiss watch, and withal just as smoothly running. With no model to follow and no instruction of any kind (where was the model? Who could instruct?) the writer of that book brought together thousands of ideas and events and knit them together in a most marvelous unity. Yet the critics like to think they have explained the Book of Mormon completely if they can just discover where Joseph Smith might have got one of his ideas or expressions! MIX 546.

If we were to ask an IBM machine, a super-electronic memorizer, associator, and classifier of data, to tell us which cultural, historical and intellectual influences are most prominent in the Book of Mormon, we would consider the machine's response utterly worthless unless we had first stocked it with ten thousand times more facts than any human mind contains. Yet every Book of Mormon critic thinks he can answer the question by referring to whatever tiny patch of knowledge he happens to sit on. What do we trust in the critics? Certainly it cannot be their knowledge—it must be instinct. MIX 854.

ON THE DEAD SEA SCROLLS. If nothing else, the Dead Sea Scrolls—by throwing wide the door to possibilities that no scholar until now would even consider and by removing the classical obstacles that have always barred the layman from viewing the Book of Mormon with respect, namely the myth that the scriptures as we have them are complete and perfect for all time and that the world already knows everything essential about the ancient people of God—have set the stage for more thorough and serious study of the Book of Mormon than it has yet received. A summary of the important points of agreement between that work and the writings from the Dead Sea as we have noted them through the years will indicate what a vast field is opening out. SIN 977(9ml).

PERFECTION. The whole theme of religion is eternal life. But beings who would live forever must be prepared to do so—they must be perfect. Nothing but perfection will do for an order of existence that is to last forever and ever. The striving for perfection is the theme of the Manual of Discipline. The sectaries of Qumran knew that the greatest of all prizes was not to be cheaply bought, that there could be no cheating or cutting of corners; to prepare for eternity, one must be willing to go all the way. Whatever may have been their human failings, these people, as the Roman Catholic scholar
George Molin observed, must be taken seriously and viewed with great respect. The proper title for them, the name they gave themselves, he maintains, is "Latter-day Saints" and he deplores the preemption of that name at the present time by a "so-called Christian sect." A careful reading of the Manual of Discipline will show that it has a great deal in common with the Book of Breathings. MES 255.

BOOK OF MORMON AUTHENTICITY: EXTERNAL EVIDENCES—APOCRYPHA. The Dead Sea Scrolls bind the Old Testament and the New Testament together as nothing else, and almost all the Scrolls so far published show remarkable affinity to the Book of Mormon, as well as the restored Church. Why should this be? Or am I just imagining things? The proper cure for "parallelomania" is not to avoid parallels but to explain them: every parallel has a proper explanation, even if it is only mere coincidence or illusion. There are marks on rocks that sometimes look like writings or like fossilized plants; these are not to be ignored even though they often turn out to be misleading, because once in awhile they really are true writing and true fossils. Resemblances between the Bible and the Book of Mormon are not hard to explain; far from being evidence of fraud, they are rather confirmation of authenticity. If the Book of Mormon is what it pretends to be, we should expect to find a strong biblical influence in it. Its prophets sound like those of the Old Testament because they studied and consciously quoted the words of those prophets, and all prophets moreover are programmed to sound alike, being called for the same purpose under much the same conditions. CNW 165.

1. The tradition of the sacred buried record meets us full-blown in the similar preservation of the scrolls and the Book of Mormon.
2. The community of Qumran was led into the desert by such a man (as Lehi) centuries later, and there is considerable evidence that his was an established and traditional routine of great antiquity.
3. We find the Qumran people offering animal sacrifice and observing the Law of Moses under the directio of legitimate priests, and yet at the same time observing ordinances of a strangely Christian nature...its counterpart is found in the Book of Mormon.
4. The Qumran people denounce the Jews at Jerusalem for their corruption and laxity in observing the Law... This is exactly the attitude of Nephi.
5. They keep the Law of Moses but in everything anticipate the coming of the Messiah and the New Covenant. . .This parallels the Book of Mormon situation exactly.
6. They see a peculiar significance in going out into the wilderness and in choosing a site where they can establish a large and elaborate system of tanks and basins for washings and baptisms. One thinks immediately of Alma's community in the wilderness at the Waters of Mormon.
7. They were organized into a general congregation with a council of twelve laymen headed by three priests.
8. The Dead Sea writings are full of angels, prophets, ancient writings, and prophecies of things to come, especially the coming of the Messiah, the literal resurrection of the dead, and the destruction of the world by fire. These things are treated in a peculiar "apocalyptic" way that is much closer to the Book of Mormon than to the Bible.
9. Some scholars believe that the greatest single revelation of the scrolls is the existence of a great prophetic tradition that has been completely forgotten. Its greatest representative is the mysterious "Teacher of Righteousness" or "Righteous Teacher," a major prophet whose very existence was unknown until 1950...he was of priestly descent, being of the line of
Zadok, another mysterious prophet, whom some believed lived at the time of Moses and who is the type of the true priest who looked forward to the Messiah... the important thing is the discovery not of controversial individuals but an undeniable tradition of a line of persecuted Messianic prophets. This is in perfect agreement with the Zenock and Zenos tradition in the Book of Mormon.

10. For the first time we now learn of the ancient Jewish background of (1) the theological language of the New Testament and Christian apocrypha, (2) their eschatological doctrines, and (3) their organizational and liturgical institutions. All three receive their fullest exposition in 3 Nephi... DEA 234-35.
