Between 1830 and 1981, all printed editions of the Book of Mormon contained the phrase “straight and narrow path [or course]” in four verses. The change in 1981 to “strait and narrow path [or course]” has been supported by several arguments, including the lack of the phrase “straight and narrow” in the King James version of the Bible. Welch counters this argument with the history of the introduction and rise of the phrase “straight and narrow” among Western authors. Working through each of the other arguments and offering his own counterarguments and evidences, he delivers his opinion that these phrases should not have been changed and should still read “straight and narrow path [or course].”
Straight (Not Strait) & Narrow

John S. Welch
In all printed editions of the Book of Mormon between 1830 and 1981, four verses—1 Nephi 8:20; 2 Nephi 31:18–19 (twice); and Helaman 3:29—contained the phrase “straight and narrow path [or course].” This phrase does not appear in the King James version of the Bible. The Savior, in twice describing the “way, which leadeth unto life” (Matthew 7:14; 3 Nephi 14:14), only mentioned the way’s width and not the shape of its length; but that was a part of a lovely poetic parallelism that paired the “strait gate” with the “narrow way,” both of which “leadeth unto life.”

Had the Lord said, “Strait is the gate, and straight and narrow is the way,” it would have been more descriptive but less poetic. And had he said, “Strait is the gate, and strait and narrow is the way,” it would have been no more descriptive and also less poetic. The Savior may have seen no need to spoil the poetry in that one instance with the addition of another dimension of the way to life (“straight”), knowing that his hearers were well aware of the ancient commandments to “walk in all the ways which the Lord your God hath commanded you” (Deuteronomy 5:33) and to “not turn aside to the right hand or to the left” (v. 32)—that is, to go straight.¹

In order to understand the rise and influence of the more descriptive expression “straight and narrow” among Western authors, it is important to sketch a brief history. In the early Christian church, the phrase “straight and narrow” came into use. Cyprian, a church father of the third century, in an apparent paraphrasing of Matthew 7:13–14, wrote, “How broad and spacious is the way which leadeth unto death, and many there are who go in thereby; how straight and narrow is the way that leadeth to life, and few there are that find it!”² He also wrote, “We must persevere in the straight and narrow road of praise and glory.”³
Likewise, Origen, of that same era, seemingly paraphrased Jesus: “Now, those who believe in Him are those who walk in the straight and narrow way, which leads to life, and which is found by few.” The Oxford English Dictionary says that this derivation (“straight and narrow”) from Matthew 7:14 is incorrect, apparently because of the presence in the verse of strait, an adjective describing gate, not way (OED Online, 2nd ed., s.v. “straight”). In my view, these early writers were probably not misreading the verse but verbalizing what seemed to them to be a natural implication in it of a more complete description of “the way which leadeth unto life.”

The circulation of this phrase in the Christian world was greatly increased by the publication of John Bunyan’s The Pilgrim’s Progress in 1678, which was eventually reissued in 100 other languages and is called the greatest of all Christian writings. In this classic, Goodwill tells Christian, the protagonist, “[T]he way thou must go . . . is as straight as a rule can make it.” Christian then asks, “[A]re there no turnings or windings, by which a stranger may lose his way?” And Goodwill answers, “Yes, there are many ways butt down upon this, and they are crooked and wide. But thus thou mayest distinguish the right from the wrong, the right only being straight and narrow.”

Thomas B. Macaulay, in volume 2 of his Critical and Historical Essays, wrote in about 1831 regarding The Pilgrim’s Progress that “[e]very reader knows the straight and narrow path as well as he knows a road in which he has gone backward and forward a hundred times.” Scores of literary and religious usages could be cited.

It seems reasonably certain that by the time of the translation of the Book of Mormon (1829), the phrase “straight and narrow” was a common English idiom used in secular and religious writings and meaning essentially, according to many dictionaries, “the way of proper conduct and moral integrity.” So it is not difficult to believe that the concept of a straight and narrow path leading to life eternal was a firm part of the young Joseph Smith’s working vocabulary.

The spelling of English words in 1829 was less rule-bound than today—straight was sometimes spelled strait, and strait was sometimes spelled straight. Oliver Cowdery’s choice of spelling in the printer’s manuscript of the Book of Mormon (and presumably in the original manuscript) for dictated words that sounded like “strate” was uniformly strait whether the context indicated “straight” or “tight, narrow, or constricted.” Conversely, the printer changed the spelling of all these words to straight (even to straight gate) in the first edition. Either approach was acceptable at a time when straight could also mean “strait” and strait could also mean “straight,” depending on the context.

I see no reason to think that either Cowdery or the printer was trying to specify the translator’s intent or doing anything else except to prefer a single spelling for both meanings. But this development left it up to the reader to determine the meanings and presented a need for emendations based on context and usage. Thus, when the rules of spelling changed, editors emended occurrences of straight in the Book of Mormon back to strait where the context indicated the need. This process began in 1906 and continued until 1920, so that the following verses then variously read:

he did straiten them . . . straitened them (1 Nephi 17:41, twice)
the place is too strait (1 Nephi 21:20)
strait gate (Jacob 6:11; 3 Nephi 14:13–14 [twice]; 27:33 [twice])

Those changes (eight in all) were obviously needed. And of equal importance, the following seven occurrences of the word straight were left unchanged from 1830 to 1981.

make his paths straight (1 Nephi 10:8)
a straight stick (1 Nephi 16:23)
make my path straight (2 Nephi 4:33)
in a straight course (2 Nephi 9:41)
his paths which are straight (Alma 7:9)
his paths are straight (Alma 37:12)
straight course to eternal bliss (Alma 37:44; see also Alma 50:8; 56:37)

The four other usages in question here—1 Nephi 8:20, 2 Nephi 31:18–19, and Helaman 3:29, reading “straight and narrow path [or course]”—were also left unchanged until 1981, when in the new edition of the Book of Mormon the spelling of straight was changed in these four instances back to strait. All
subsequent printings of the Book of Mormon conform to that spelling. Some reprints of pre-1981 works by Latter-day Saint church leaders and writers also conform to that spelling, while some post-1981 writings by such authors have continued to use the phrase “straight and narrow.” The reason for or significance of these 1981 spelling changes has never been officially explained. Perhaps as a consequence, and certainly from a language standpoint, these changes and their meaning have since been and still remain a subject of question, discussion, and some differences of opinion among Latter-day Saint scholars and others.

The four instances and two others now read:

strait and narrow path [or course] (1 Nephi 8:20; 2 Nephi 31:18, 19; Helaman 3:29)

the straitness of the path . . . narrowness of the gate (2 Nephi 31:9)

the narrow gate and . . . the strait path (2 Nephi 33:9)

The changes in 2 Nephi 31:9 and 33:9 (introduced into the 1981 edition) are reminiscent of Matthew 7:14 (although the adjectives in the former passages are reversed, with strait defining path and narrow defining gate) and seem to be good poetic parallelisms, and thus different from the four other cases in which two synonymous adjectives, strait and narrow, redundantly define only one subject, a path or course.

As noted above, the four 1981 changes in 1 Nephi 8:20, 2 Nephi 31:18–19, and Helaman 3:29 have resulted in questions, discussions, and different opinions. For example, in 1992, in a brief article in the Encyclopedia of Mormonism, Daniel McKinlay suggested that the words strait and straight can be interpreted in several permissible ways, even within a single appearance.10 His observation left open the possibility that strait in the Book of Mormon may, in a given instance, mean either “straight” or “narrow.” It seems a fair inference to me, however, that in leaving many of the spellings of straight in place while changing six of them to strait, the editors of the 1981 edition must have intended these two words to be understood as always mutually exclusive. Otherwise, the Book of Mormon would contain three sets of words, a set spelled strait, which clearly means only “narrow” or “confined”; a set spelled straight, clearly meaning only “not crooked” or “direct”; and a set spelled strait, which could mean either “straight” or “strait,” depending on the reader’s preference. It seems doubtful to me that there was any intent to create such ambiguities.

This Encyclopedia of Mormonism article also suggested that the phrase “strait and narrow,” when read to mean “narrow and narrow,” might reflect a Hebrew literary parallelism in the original Nephite text. I address this possibility later in my discussion.

In 2001 a study by Noel B. Reynolds and Royal Skousen that appeared in the Journal of Book of Mormon Studies expressed the modest opinion that, in the four passages listed above, the word strait is a “problematic” spelling.11 In passing, it also gave the view that, when read as a redundancy, “strait and narrow,” as compound modifiers of a single noun, cannot be read as a poetic parallel. I agree with this last assessment.

Another article published in this journal, in 2003 by Paul Y. Hoskisson, focused on the aforementioned four verses,12 spelled in the 1981 Book of Mormon as “strait and narrow path [or course],” in reading that phrase to mean a “narrow and narrow
path [or course],” the author of that study disagreed with the 2001 article, offering reasons not only to justify but also to favor this parallel but less informative redundancy. This conclusion was reached not by asking which reading is supported by the context or which is more enlightening or more descriptive of the metaphorical path or course leading to the tree of life (or to eternal life or to the kingdom of heaven, as the four contexts variously indicate), but by a comparison of two ancient Hebrew roots. I do not find this theory to be persuasive for reasons I will elaborate on below.

In 2004, in Analysis of Textual Variants of the Book of Mormon, Part One, Royal Skousen recommended, as a procedure of conjectural emendation, that the spelling of strait as it appears in the four verses under consideration be returned to its pre-1981 spelling, straight. Quite clearly, a consensus on straight versus strait is lacking. My attempts to help reach it follow.

First, I suggest that when a word like strait is used in a modern printing of an 1829 text, it should be understood to have the same meaning that it had in 1829, if that meaning can be ascertained. This brings us to the question of whether “strait and narrow” with the proposed meaning “narrow and narrow” might actually reflect a Hebrew literary parallelism in the original Nephite text.

I submit that it does not. This rendering would not appear to be a good example of parallelism even if it read, “The way for man is narrow and the way of man is strait,” because it does not seem to conform to the poetic format—it adds no emphasis or color. Consider for comparison the scriptural verse “shall run and not be weary, and shall walk and not faint” (Doctrine and Covenants 89:20). Run and walk are related but not synonymous. So are be weary and faint. But paired together, the two ideas create a more vivid image than either phrase does alone. In this connection, I see a striking difference between, on the one hand, a phrase in which the word gate appears with path, with each noun modified with one similar adjective, thus allowing a poetic comparison (as in 2 Nephi 33:9 and Jacob 6:11, “strait gate and narrow path”) and, on the other hand, a phrase (such as in the four verses under discussion) in which the word gate is not present alongside reference to a path (or course) described as both “strait and narrow.”

More pointedly, I cannot imagine any good reason why a poet would have used two synonymous adjectives to describe a path if the intent was to portray only the width dimension. I know of no scriptural passage other than the four verses being considered where the speaker or writer saw fit to describe either a gate or a path as both strait and narrow. And these four can hardly be used to establish their own claimed validity.

Wherever in the Book of Mormon there is an adjective other than the word narrow defining a path or course (except for the four verses under discussion), it seems always to be straight, never crooked. Nephi prayed for his path to be “straight” (2 Nephi 4:33). Jacob spoke of the way of man as being a “straight course” (2 Nephi 9:41). Alma the Younger spoke to his son Helaman of a “straight course to eternal bliss” (Alma 37:44), and he taught the people of Gideon that Christ “cannot walk in crooked paths” (Alma 7:20). Hence straight is an important Book of Mormon concept in connection with the terms way, path, and course. It is also biblical. In Luke 9:62 one finds the analogy of the farmer’s ideal of plowing in a straight line, which one can do only by fixing his eye on the goal ahead.

Going further back, we note that the children of Israel were commanded, as mentioned earlier, to walk a straight path (see Deuteronomy 5:32–33).

Any competent stenographer or scribe who hears a homophone with two or more meanings will write the word that the context of the dictation indicates. The speaker (again, presumably competent in spelling) will change the spelling on review if the wrong homophone was used.

Joseph Smith dictated his translations to Oliver Cowdery by spoken English words. It is reasonable to assume that Oliver knew both meanings for the spoken sound “strate” (i.e., “straight” and “narrow”) and, under the lax spelling rules mentioned above, always spelled the word strait in the manuscript for both meanings, possibly because the word was two letters shorter than straight. It is reasonable to assume that the printer also knew both such meanings but thought the word in either case should be spelled straight, and so he corrected all the words accordingly. It does not seem reasonable to assume that in such spelling choices Oliver meant for the reader to think that in every usage the correct meaning of strait was “narrow” or that the printer meant for the reader to think that in every usage
The correct meaning of *straight* was “in a straight line” or “direct.” Perhaps they were not sure which meaning was intended by Nephi or Mormon and chose to leave that to the reader (or to later authoritative interpretation). We don’t know. But in later editions of the Book of Mormon published when stricter rules of spelling were observed, editing that occurred up to 1920 to change *straight* to *strait* in proper cases was appropriate.

What seems to have happened in the case of a homophone (except wherever the change was inspired) is that the editor selected the spelling that seemed to better present the meaning indicated by the context. In the 1920 edition the word *straight* in the four verses (as well as all other usages) was allowed to remain in place. As noted, in the 1981 edition the word *straight* in those four verses was changed to *strait*.

Let us now consider the possible factors that may influence one’s choice of meanings. For one thing, a presumption should stand against a reading that creates a mere redundancy. Unless some strong reason for a redundancy existed, it seems unlikely that Nephi or Mormon would have used up a rare commodity like gold plate and taken the extra time to painstakingly inscribe the redundant word in four different places.

Moreover, in selecting a meaning, one should consider all of the possible alternatives. *Straight* can mean more than “in a straight line.” It can mean “direct.” In fact, that is a good meaning as applied to define *course or path*. Nephi’s poetic prayer for redemption in 2 Nephi 4:33 includes the plea “Wilt thou make my path straight.” This is one of a number of scriptural images of the path (course) to salvation (eternal bliss, promised land, the way to the keeper of the gate) being a straight (direct) route (see also 2 Nephi 9:41; Alma 37:44). When a mother says, “After school, you come straight home,” it means by either the shortest, quickest, safest, or easiest route, as the child has been given to understand. In the case of directions given by the Liahona (see Alma 37:44), a straight or direct course probably connoted “expeditious” or “best.” Thus we should be open to more possibilities than one might ordinarily think of.

When a substantive change to a scriptural text is being considered, some weight should be afforded to the traditional understanding of the text. Leaders, writers, and composers of the restored Church have found the phrase “straight and narrow way [or path or course]” to be a useful tool, using it on at least 625 published occasions, with a significant number of these having occurred after 1981.

For example, President J. Reuben Clark in *Behold the Lamb of God* (1962) and Elder Neal A. Maxwell in *All These Things Shall Give Thee Experience* (1979) use this expression repeatedly. Nor is this phrase a recent construction. Eliza R. Snow used the term in her 1884 biography of Lorenzo Snow, and in 1954 Elder Joseph Fielding Smith wrote in his *Doctrines of Salvation*, “While no doubt, that path which leads into the presence of God is straight, it is also strait, which means that those who enter into it will find it restricted; it is narrow.”

Turning now to the main issue, I submit that in searching for meaning in the four occurrences of *straight versus strait* in question, the correct questions to ask are, Which is more enlightening? Which presents the richer or more descriptive image? What image naturally comes to mind in these passages? Which meaning will help me more to order my life in my quest for eternal life?

To me, the metaphor that projects an image of a path or course that has not only width but also direction, especially a path or route that is straight (or most direct, shortest, or quickest), is more helpful than one that tells us twice what the width of the path is but is silent as to whether the path is straight or full of twists and turns.

Turning to the four passages under discussion, we note that 1 Nephi 8:19–20 describes a path that “came along by the rod of iron,” which “extended along the bank of the river,” even “to the tree.” The precious image is of people holding to the rod of iron as they press forward to the tree. The rod of iron is not expressly described as straight, but it had to be straight. The rod of iron is, after all, a metaphor for the word of God, which is never visualized as twisted or bent or meandering. It is very hard to mentally picture the rod of iron weaving to the right or left in leading to the tree of life. A crooked rod would suggest a great waste of metaphor iron and make the route to the tree longer for the eager seekers. Obviously, if the rod of iron was straight and if one could both hold to the rod and walk in the path, then the path also had to be straight—not bent, not crooked, and not even merely direct. And a very narrow path would suffice for one holding to the rod. So it would have been sufficient to merely...
refer to the path without adjectives; but if adjectives were to be used, it would seem that they would need to define the path completely (i.e., straight and narrow) or not at all. Likewise, the gist of 2 Nephi 31:18–19 is to give advice on how to enter the celestial kingdom. This context certainly suggests moving onward and upward in a straight or unwavering path as well as in a narrow or restricted one.

Helaman 3:29 deals with getting across that “everlasting,” “terrible,” and “awful” metaphoric gulf, which clearly implies that the surest way to go is to stick to the shortest and most expeditious (i.e., straight) route (see 1 Nephi 12:18; 15:28). This verse refers not to a path or way, but to a “course.” If the word gulf calls up a mental picture of a body of water, then there is no path or way to travel on. It is a course or route, and by definition the course is narrow—no wider than the body of the man of Christ’s or his boat, as he wades, swims, or rows. It adds nothing to say once, let alone twice, that the course is narrow (i.e., strait and narrow). Properly instructed, he will get across the gulf as quickly as possible by spending no time meandering about. So it is important to say the course across the gulf is straight. Alternatively, if some Latter-day Saints see the gulf as a metaphor for mortal life in the lone and dreary world, then, again, the desire of the righteous is to go straight home to Father—not wandering, not falling away into “forbidden paths,” and not getting lost.

To me, the contexts of these four occurrences all make it quite clear that the correct meaning is “straight and narrow,” not “strait and narrow.” That correct meaning gives us two complementary dimensions to the path or course. It fits within the textual context. Beyond that, I submit that it is plausible and edifying, whereas the phrase that means “narrow and narrow” is a mere redundancy, incomplete, and, within these metaphors, not sufficiently informative. In my view these points are persuasive criteria for deciding such an issue when there are no other criteria of comparable force.

Crucial to this discussion is the scripture in 2 Nephi 9:41 that reads:

Come unto the Lord, the Holy One. Remember that his paths are righteous. Behold, the way for man is narrow, but it lieth in a straight course before him.

The spelling of straight here has remained unchanged since the Book of Mormon’s first publication in 1830. Such consistency should not be an amazing or disturbing fact. This reading is perfectly clear. It expresses a complete thought. But if straight were to be replaced with strait, the reading would no longer be clear, beautiful, or complete. On the contrary, it would be, I think, unclear, ungraceful, and incomplete, unless the reader is mentally able to substitute straight for strait.

In contrast, Hoskisson’s 2003 article cited earlier, in which the current reading of these four verses is defended, asserts that 2 Nephi 9:41 is an anomaly and that the word but in this passage can be read to mean “moreover” or “in addition.” That article contends that this verse is anomalous because it stands alone in its pairing of the word straight with narrow. It stands alone, however, only if it is assumed that the word strait was correctly substituted in 1981 for straight in the other four verses under examination, which, of course, is begging the unresolved question.

In every printed edition of the Book of Mormon, 2 Nephi 9:41 has read, in part, “The way for man is narrow, but it lieth in a straight course before him.” The phrasing is clear as it stands. Substituting the word strait for straight would seem to be wrong unless the word but is also actually wrong. But this but does not seem to be actually wrong. In what seems to be a last resort for justifying the replacement of straight with strait in these four verses, Hoskisson goes on to say that the word but in this supposedly anomalous verse really means “moreover,” “in
addition,” or “and.”21 This shift is necessary in order to validate the change from straight to strait. But a simple experiment with these proposed substitutions shows that the proposal does not work. Which makes more sense: “the way for man is narrow, but it lieth in a straight course before him” (as 2 Nephi 9:41 now reads) or any of the following proposed emendations?

the way for man is narrow, and it lieth in a strait course before him

the way for man is narrow; moreover, it lieth in a strait course before him

the way for man is narrow. In addition, it lieth in a strait course before him.

Once again, after any such recommended semantic substitutions, we would be left with a verse with two synonymous modifiers that tell us twice that the course is narrow but that its length is undefined, instead of two contrastive modifiers that tell us that the course is not only narrow but straight or direct. I believe that 2 Nephi 9:41 needs no emendation and should be left as it has stood since 1830. I also believe that if this reading is allowed to stand, the disharmony between this strong provision and the four instances of strait in 1 Nephi 8:20, 2 Nephi 31:18–19, and Helaman 3:29 will also need to be corrected by emending them back to how they stood from 1830 to 1981—that is, by restoring straight.

The Hoskisson article also needs to call 2 Nephi 9:41 an anomaly because it conflicts with the article’s theory of the two ancient paired Hebrew roots. But I submit that the two-root theory can as easily be called anomalous because it conflicts with 2 Nephi 9:41. I think (and attempt to show below) that this is the stronger position, namely, that 2 Nephi 9:41 reflects consistent usage in the Book of Mormon text and is correct as written.

If I understand this theory, the Hebrew root for “narrow” is sometimes paired with the Hebrew root for “strait,” and therefore this pairing might have been present in the Hebrew version of this verse. Possibly. But these Hebrew words are not always paired. In Job 36:16 the word strait (the Hebrew root for which, according to Strong’s Exhaustive Concordance of the Bible, is tswr, one of the cited roots) stands unpaired in an antithetical parallelism with broad.

This theory seems to be based on the following assumptions: For the two Hebrew roots, there were two different reformed Egyptian characters in the gold plates that seemed to Nephi and Mormon to form a redundancy sufficiently important in defining only the width of the metaphoric way or course to overcome the need for economy in inscribing on plates of gold. But they saw no need to say whether that narrow and narrow (sic) route lies in a straight line or meanders about. The entire theory of the paired ancient Hebrew roots rests on these assumptions, and they are merely assumptions.

In short, I do not find this two-root scenario persuasive. Nor do I think a compelling case can be made for replacing straight in 2 Nephi 9:41 with strait or for retaining that spelling in the 1981 versions of 1 Nephi 8:20, 2 Nephi 31:18–19 (twice), and Helaman 3:29. Even if that theory gives a proponent for change a 50 percent chance of being right, it would certainly not be enough to warrant emendation of the Book of Mormon text, since conjectural emendation adheres to a higher standard. In Analysis of Textual Variants of the Book of Mormon, Part One, we read, “The crucial restriction on conjectural emendation is that there must be something actually wrong with the earliest extant reading.”22

After saying all of the above, I suspect that no more than a few people will see a pressing reason to have these issues resolved in an official way. Changes in the Book of Mormon text always seem to be used by enemies of the Church in their ongoing claims against its authenticity. And these four 1981 changes in the wording can hardly be said to have seriously confused the members in their scriptural imageries. Just ask a member to draw a sketch of the path alongside the rod of iron or the course across the everlasting gulf of misery and you will most likely get a straight path or course. As the accompanying illustrations for this article show, artists see it that way too. A straight line is still the shortest distance between two points. A direct route is better than one that meanders, no matter how strait it may be.

I conclude that readers of the Book of Mormon should continue to understand these “strait and narrow” phrases to mean “straight and narrow,” just as they appeared for 150 years in all pre-1981 editions of the Book of Mormon, and should continue to picture that straightness in their minds as they ponder the images brought up by the applicable scriptures. ♦

As for the order of events, Joseph Knight’s mention of “revelations” (possibly refer ring to sections 4 and 5 in the Doctrine and Covenants) and his specifying that he went to Harmony “the last of March” indicate that the Knights arrived in Harmony shortly after Martin Harris and Rogers (Joseph Knight Sr. reminiscence, in EMD, 4:19). Martin Harris’s state ment that he went in March, accompanied by Sayre’s recol lection that he was traveling on the stagecoach in April, indicates that Harris and Rogers may have arrived the last week in March and left a day or two before the Knights arrived (Harris testimony, in EMD, 2:332; Sayre to Cobb, in EMD, 4:144). It could have been April by the time they boarded the same stage as Sayre—somewhere between Bainbridge and Geneva. As for Sayre’s mention of a one room house, the house occup ied by Joseph and Emma originally had two rooms on the ground floor and one room upstairs (Porter, “Orig ins,” 51), Martin may have been referring to the upper story, where Joseph worked on the translation.

76. Biographical Sketches, 131. Lucy, Joseph, and Oliver all make it clear that Joseph and Oliver met for the first time on April 5, 1829. Those who argue that they actually met before that time have provided undocumented speculation but no real evidence. See note 3.

77. See EMD, 4:424–31, for details on the land transaction.

78. Oliver Cowdery to W. W. Phelps, September 7, 1834, 14, emphasis in original. See EMD, 2:419, and Joseph Smith—History 1:71 note. Statements from David Whit mer, Emma Smith, and others indicate that Joseph used the seer stone to translate during this time. Both Joseph and Oliver, however, apparently used Urim and Thummim generically, sometimes refer ring to the apparatus deliv ered by Moroni and some times referring to the seer stone (which was purportedly discovered by Alvin, Joseph Jr., and Willard Chase when the three of them were digging a well in 1822—see Chase statement, in EMD, 2:65).

1. See Joshua 23:6; compare Alma 56:37, “They did not turn to the right nor to the left, but pursued their march in a straight course.”

7. For examples, see William Penn, Advice of William Penn to His Children (London: Assigns of F. Swale, 1726), “the straight and narrow Way that leads to Life Eternal” (image no. 7 in the online version in the database “Eighteenth Century Collections Online,” accessible at infotrac. galegroup.com with a sub scription); Jonathan Edwards, A Treatise concerning Reli gious Affections (Edinburgh: Laing and Matthews, 1789), 472, “the straight and narrow way which leads to life”; and Jane E. 19. H. Alan Smith, "The Sword of Laban as a Symbol," 48–54, focuses intensively on Nephite society, as king and to anoint a successor. And while the national symbols Nephi acquires—the sword of Laban and the brass plates—quite clearly symbolize distinct civic and sacred aspects of Nephiite society, it is surely true that his role as prophet looms larger than his role as king. But in the specific focus of this paper—the slaying of Laban—Nephi acts more in a civic than in a sacred capacity, more as king than as prophet.

20. Remembering, "Lament and King, an Anachronistic Republic. And while the national symbols Nephi acquires—the sword of Laban and the brass plates—quite clearly symbolize distinct civic and sacred aspects of Nephiite society, it is surely true that his role as prophet looms larger than his role as king. But in the specific focus of this paper—the slaying of Laban—Nephi acts more in a civic than in a sacred capacity, more as king than as prophet.

7. This is just the first manifestation of Nephi's kingly power and leadership. By chapter seven (1 Nephi 7:20), Laman and Lemuel are bowing down before Nephi and by chapter seventeen (1 Nephi 17:55), they are attempting to worship him as if he were divine.

9. As Snark has noted (pp. 64–65), the word murmure evokes the Mosaic exodus, framing Nephi as Moses and Laman and Lemuel as part of rebellious Israel. Its first appearances in the Bible are Exodus 15:24 "And the people murmured against Moses, saying, What shall we drink?" Exodus 16:2 "And the whole congregation of the children of Israel murmured against Moses and Aaron in the wilderness," Exodus 16:7–9, etc. Terrence L. Sinsk, "To a Land of Promise (1 Nephi 16–18)," in Studies in Scripture: Volume Seven, 1 Nephi to Alma 29, ed. Kent P. Jackson (Salt Lake City: Deseret Book, 1987), 60–72.

11. In the text, Zoram is called Laban's servant, but servant is probably a euphemism for slave as it is in the King James Bible where the Hebrew ebed and Greek doulos are both translated as servant but, in most cases, would be more correctly translated as slave.

16. After reading a draft of this article, Newell Wright pointed out that the Book of Mormon sets up an ironic contrast between Nephi who has killed but is not a murderer and Laman and Lemuel who have not killed but are "murderers in [their] hearts" (1 Nephi 17:44). The nub of this contrast is the striking difference in the intentions and will of
